(1) Identify two important practical reasons for building a solar farm

- To meet electricity demand
- To reduce CO₂ emissions
- To use good solar resource
- To take advantage of available land

(2) Identify two important financial reasons for building a solar farm

- To produce income for land owners
- To give land two purposes (like PV + farming; PV + ranching)
- To produce an investment with high expected ROI (return on investment)
- To take advantage of government incentives
